深圳捷迅易联专业为客户OEM/ODM物联网云平台相关无线安防报警系统, 水气表低功耗抄表系统, 农业物联网管理系统等方案开发. 此方案主要有云端软件服务层, 网关通讯中心层, 采集传感器终端层共三层组成, 其系统结构框架图如下:

ShenZhen YL-LINK Co,ltd Professional development of IOT system,we OEM/ODM Customize the plan for the customer,and IOT system consists of three parts. first is the cloud soft,second is the rf gateway,and the third is equipment sensor. The composition of the structure is as follows:

物联网管理系统构成框架图 Equipment IOT Management System

公司优势 Our Advantage:

我们不仅为最终客户提供相应的物联网平台管理系统一站式的技术支持与服务. 也可以为工程商, 系统集成商提供相应的通讯网关和传感器终端, 并配合客户的系统做相关协议的修改, 用我们的技术优势迅速提高客户的产品等级, 第一时间为客户赢得市场.

We not only provide the one-stop technical support and service for the end users about IOT system, but also provide the RF Gateway and the equipment sensor for System integrator, And cooperate with the customer's system to make the modification of the relevant agreement.

Provide product grade and Increase customer profits.
